PROFILE

Full Stack Developer with a background in high-scale telecom (**Nokia**) and agile startup leadership. With nearly 3 years of hands-on expertise across **Frontend (React, Angular)**, **Backend (Node.js, FastAPI)**, and **Data Intelligence**. Managed teams of developers to rebuild core architectures and launch AI-integrated products from MVP to production. Recognized for optimizing **system performance by 50%+** and designing automated pipelines for complex data ingestion and 3D prototyping.

PROFESSIONAL EXPERIENCE

Technology Lead 2025 Sep – Present
Ease My Expo

- Managing a team of developers to build and scale 4 core products (**Leads, Stall Designer/Calculator, Communities**) using a **React, NodeJs** and **FastAPI** stack.
- Built Communities, a "LinkedIn for Exhibitions", using **React** and **Google Firebase** (Auth/Firestore); implemented **dynamic feeds, real-time chat**, and a **connection system**, leveraging serverless architecture to handle 100% of backend logic and database management for a cross-platform user base.
- Optimized "Leads" by implementing a multi-modal data extraction engine, including an **OpenCV-based** map segmentation system; chunked complex floor plan PDFs/images for targeted **AI processing**, increasing extraction accuracy from **40% to 95%**.
- Led the development of "Stall Designer," a **GenAI** tool that converts text-based requirements into 3D prototype images, reducing design lead time from days to seconds.
- Developed "Stall Calculator" to automate **ROI** and logistics modeling (flights/hotels) and built a high-density **Admin Panel** to monitor real-time usage metrics and system health.

Sr. Frontend Developer 2025 Apr – 2025 Sep
NOKIA (Parent: Elikem Softwares)

- Led the migration and ground-up rebuild of the main web application to a new **React and Node.js** based architecture, with a team of 4.
- Provided technical training in fundamental **HTML, CSS, and JavaScript** to the backend team, and subsequently developed and deployed **Flask-based** web applications, accelerating project completion time by approximately 55% and boosting overall team efficiency.
- Optimized Angular app performance by restructuring change detection strategies, reducing rendering lag on complex tables by 50%.
- Geolytics**- Tool made for seamless cell tower data ingestion, validation, and visualization, enabling stakeholders to monitor and analyze KPI trends in network performance intuitively, thus improving analytical **turnaround by 67%**

Frontend Developer 2023 Aug – 2025 Apr
NOKIA (Parent: Elikem Softwares)

- Independently maintained and enhanced the core **Angular+Springboot** web application for one year, significantly improving data processing and analysis **efficiency by nearly 75%**.
- The web application is critical for processing raw telecom data into actionable insights, identifying trends, and errors.
- Collaborated with backend teams to define API contracts, resulting in smoother handoffs and **reduced frontend bugs by 30%**.
- Built modular, reusable components following component-driven development and DRY principles
- Automated network graph** generation to support faster diagnostics, capacity planning, and infrastructure optimization.

SKILLS

Frontend	Backend	Database	Other Tools
JavaScript, React, Angular, NextJs, Tailwind, Bootstrap	Node.js, Express, Python (Flask, FastAPI)	PostgreSQL, MongoDB	Git, Postman, Apache Superset, Vercel, Google Firebase, Google Cloud

CERTIFICATION/COURSES

Certified ScrumMaster (Scrum Alliance - CSM ☞)

EDUCATION

SRM Institute of Science and Technology, Main Campus(KTR) 2017 – 2021 | Chennai, India
B.Tech- Automobile Engineering
